
Invitation Letter for the OMC Event

Dear Reader,

We would like to invite you to take part in the [INCAREHEART Open Market Consultation](#), a series of activities in June 2021 to give advance notice to potentially interested bidders about this forthcoming call for tender.

Each procurer will hold an OMC event in their local language to engage with their country stakeholders. In addition, an international OMC webinar will be organised in English to enable participants from any location.

We are pleased to welcome you to the **International OMC** on **29 June 2021** at **9:00**. Registration is available on the project website at the following [link](#).

During the event, you will become familiar with the INCAREHEART initiative, how innovative market players can participate, and the benefits that the tender process can bring.

Due to your professional profile, we see that this could be an opportunity for you to expand your products, services, and your business connections.

Below please find more information about the INCAREHEART project.

In case of any questions, please do not hesitate to contact us at the following email address: Incareheart@empirica.com.

Best regards,

Sonja Müller, empirica

On behalf of INCAREHEART project team

About INCAREHEART Pre-Commercial Procurement (PCP)

INCAREHEART brings together five procurers: Region Jämtland Härjedalen (Sweden), Università degli Studi di Napoli Federico II (Italy), Region of Central Macedonia (Greece), Santa Casa Da Misericordia Da Amadora (Portugal) and Ministry of Health of Turkey. Together, they seek to procure an ICT-enabled integrated care solution to effectively support the management of a multidisciplinary care and support model for people living with Chronic Heart Failure (CHF).

For the first time, a range of features will be integrated into a modular solution to effectively bring together different care providers, family carers, and patients into a shared CHF care pathway cutting across diagnosis, acute care and jointly managed long-term care. This will build on advances seen in integrated healthcare delivery.

By introducing seamless transitional care processes, we expect to effectively reduce emergency and hospitalisation care needs and costs, as well as increasing treatment adherence.

The Open Market Consultations (OMC) are scheduled for June 2021 and procurement is anticipated to be completed by December 2021. For more information on the Prior information notice Prior information notice and the OMCs, please, click on the following [link](#).

Please note that participation in the OMC is not a prerequisite to participate in the Call for Tender, but it is a good opportunity to be familiar with the forthcoming procurement process.
